Prices in EUR Netto

2. Scopes of activities.

1. Service technician	Assembly work, repairs and adjustment of standard components and replacement of damaged elements.
	Lubrication of elements.
	Tension setting or verification of belt tension in linear systems. Diagnostics of mechanical elements.
	Inventory of elements on the line.
2. Service engineer	Diagnostics, parameterization, regulation and optimization of electric and hydraulic drives.
	Diagnostics and verification of mechatronic and hydraulic systems.
	Diagnostics, parameterization and optimization of the tightening and welding process/system.
	Application analysis and programming of PLC / Motion controllers.
	Application analysis and programming of hydraulic controllers.
3. MFU test of tightening tools	Modifications, tuning, special training, etc.
	Electrical tightening tool testing (MFU Test). Issuing the test report.
4. Linear modules audit	Audit of the mechatronic system parameterization correctness along with the report.

The standard working hours of Bosch Rexroth Polska employees are 8:00- 16:00, 8 hours a day and maximum of 40 hours a week.

Due to the labor law, employees must be able to rest 11 hours a day before starting another shift.
